Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(c) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 3 and 6 are rejected under 35 U.S.C. 102(c) as being anticipated by Hoffman.

Claim 1 merely recited placing particular structure as set forth as elements (a) – (c) in space. Hoffman's abstract clearly sets forth a satellite system that is placed in space with the satellite system included means to detect an astronomical event, means to perform logical operations on this data and means to communicate the resulting data. The preamble of claim 1 can not be given any patentable weight because it fails to be related to the body of the claim.

Relative to claim 3 note the reference to solar wind in Hoffman's claim 8.

3. Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Hall.

Hall discloses a method for generating random number for the lottery by using astronomical events, note the abstract.

Relative to applicant's remarks there is nothing in the claim that requires the generation of truly random numbers and the specific events recited in the preamble of Hall are identified

therein as astronomical events and they also fall within applicant's own definition of astronomical event as set forth on page 9 of the specification.

Claim Rejections - 35 USC § 112

4. Claims 25 and 26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 25 and 26 the phrase "determines which of a plurality of discrete elements has recorded more events" is considered new matter because it is not supported by the original disclosure.
5. Claims 1, 3, 6, and 18-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1; the preamble fails to be clearly related to the body of the claim. In line 2 "the steps" lacks meaning because only one step is subsequently recited. In paragraph (c) the phrase "means to communication results" is clearly indefinite. In claim 6 the phrases "the mathematical rules" and "the signals" and in claim 18 the phrase "the rules" lack clear antecedent basis. Claim 25, line 5; after and it appears that "if" should be inserted.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to DAVID H. MALZAHN whose telephone number is (571)272-3727. The examiner can normally be reached on M-Th from 7:30 to 6:00.
